

To whom it may concern
MAY, 2020

It is a greeting from L'atrait Property Development Inc.
To all our valued customers, we update our PJ status, and hot news in Phnom Penh city.

- Topics of this month are,
- © Updating construction situation
 - © Impact of the COVID-19 in Cambodia

© About construction situation

It has been started framing work for 26th floor.
Also, we are doing interior works from lower level at the same time.

There is a long vacation for Khmer New year in every April ordinaly.
We usually had to have worried about the possibility that construction will be late due to the holiday.
However, work progress has been well as for now.

Also, Cambodia is exactly "dry season", it means the hottest time now.
There was planned electric control by Cambodian government in last summer, but it seems nothing for this year.

©Impact of the COVID-19 in Cambodia

COVID-19 has still spread to many countries and effects on a lot of things, but as of 20th May, it is reported that there is no new patients with this virus in Cambodia.

Our staffs feel that citizens of Phnon Penh get back their daily lives slowly.

However, Cambodia has not lifted the restriction of entering Cambodia from America or European countries.

It can be easily expected that there is a possibility of still remaining influence on something from now on.

From Cambodian government, it has been issued 14-day quarantine orders to all people who have moved across provinces, during Khmer New year and ever.

It gets the reason of a delay of several days in April and effected on our construction schedule.

We expect the possibility that we might have to extend the schedule a few days more because of late for importing materials, or restricted of activities with other countries.

We are sure to work closely together with the construction company to minimize the damage for everything.

Thank you for reading, and hope you to stay safe.

Sincerely Yours,

L'attrait Property Development Inc.
